Prof. Ko Ko

Chairman

Research and Ethics Committee
University of Dental Medicine, Mandalay

Approval is subject to following conditions:

- The principal investigator (PI) must notify immediately to the REC of any changes or deviation in the conduct of the research activity. Only with the REC's approval such changes in the study must be pursued. The PI must also make a prompt report to the REC of any new and significant information that may impact a research subject's safety or willingness to continue in the study and any anticipated problems involving risks to the participants or others.
- PI is responsible for submitting the progress report at least 6 weeks prior to the expiry of the approved date to allow adequate time for the REC for substantive and meaningful review and for assuring that the research is not conducted beyond the approved date.
- Final report is to be provided to REC at the end of the study.
- Random site visits may be carried out to ensure that informed consent procedures are appropriate.
